Cooper Goeke

Front-End Developer, Graphic Designer

Seasoned web developer with an added background in design. Searching for a challenging front-end developer role with awesome co-workers to work alongside. Never misses a chance to make others laugh.

Skills

Programming Languages

Web: HTML5, CSS3/SASS, JavaScript/ES6/jQuery, PHP, MySQL.

Other: C++, Python, Java, Visual Basic.

Web Development

Vue.js, Node/NPM, Webpack, Gulp, Laravel 5, Twig, MySQL, Foundation Grid, WordPress themes and plugins, responsive layouts.

Graphic Design

Web & UI design, video editing, logos, icons, SVG animation.

Applications

Adobe: Photoshop, Illustrator, InDesign, After Effects, Premiere.

Other: Git, Sketch 2, WordPress, Jira, VS Code.

Experience

Red Ventures — Front-End Developer — May 2017 - Current Role

Built and maintained web experiences for several large-brand websites including American Express, Bankrate, The Simple Dollar, and Frontier. Leveraged modern web technologies including Vue.js and SCSS to create performant transactional funnels. Mentored two junior developers to help grow the front-end team and transition developer responsibilities when needed. Personally organized numerous company-wide events because... it's fun!

Lampros Labs — Front-End Developer + UI Designer — Mar. 2015 - Apr. 2017

Worked alone or on a small team to develop web solutions for a wide range of small businesses and local start-ups. Projects were very diverse in scope which required flexibility and quick learning. Worked quickly to stay within tight budgets while still delivering competitive results to ensure the success of our clients. Led client facing meetings to ensure smooth input, alignment, and successful project outcomes.

Freelance Projects — Web Developer + Designer — Part Time, 2013 - 2017

Worked independently to complete dozens of freelance/contract jobs which required knowledge of front-end technologies, back-end programming, graphic design, and database design — plus some client side relations. Side projects like these greatly improved my skills and experience over the years and gave me the freedom to try new technologies as I learned about them. This freelance work, paired with my degree in computer science, is the original foundation for my career.

Education

University of Cincinnati

BS: Computer Science
Honors, Swimming
